

Data de implementação e rodadas adicionais
2006, 2012

Cobertura da embalagem

As advertências de saúde precisam cobrir 75% da frente e 90% do verso das embalagens. No geral, 82.5% do espaço da embalagem é reservado para advertências de saúde.

Frequência de rotação e histórico

A Austrália produziu duas rodadas de advertências de saúde. O primeiro conjunto, com 14 advertências, foi usado de 2006 a 2012. Um segundo conjunto, com 14 advertências, foi implementado em 2012. Dois conjuntos de sete advertências são alternados a cada 12 meses.

Restrições sobre informações enganosas

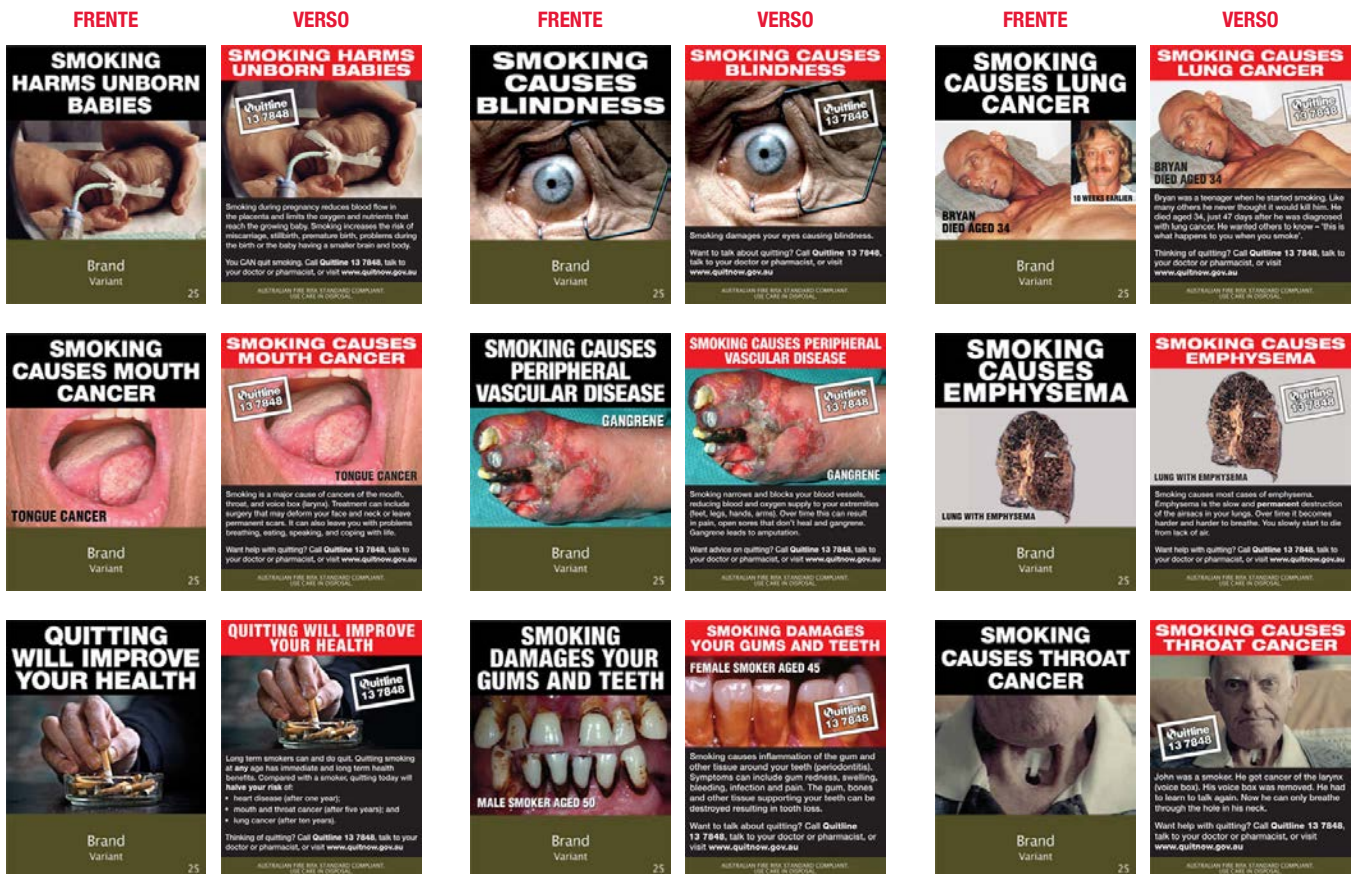

A Comissão Australiana de Concorrência e Consumo obteve compromissos na justiça com grandes empresas de tabaco para a remoção de termos enganosos, como “light”, “suave” e descritores semelhantes.

Notas especiais

Em 2011, a Austrália se tornou o primeiro país do mundo a aprovar uma lei exigindo embalagens neutras, banindo o uso de cores de marca, logotipos e outras marcações nas embalagens de tabaco. A lei deve ser implementada até dezembro de 2012. Antes de 2012, as embalagens de tabaco precisavam ter advertências cobrindo 30% da frente e 90% do verso (60% no geral).
