

NEW JERSEY WANTS  
**SMOKE-FREE AIR.**

ALL WE'RE GETTING IS  
**HOT AIR.**

**Enough talk.** It's time for the state assembly to deliver what they promised, a smoke-free air law that includes restaurants and bars. Secondhand smoke contains over 4,000 chemicals, including arsenic, ammonia and cyanide. And it causes lung cancer and heart disease—leading to over 50,000 deaths in America every year. With so many New Jersey lives at risk, our leaders must take action.

Call 800-792-8630 and tell your Assembly member:  
**Protect New Jersey. Pass the Smoke-Free Air Law now.**
