

**If the Legislature
won't protect all
Pennsylvanians
from secondhand
smoke...**

Let our communities do it.

It's time to stop the delay and pass a smoke-free law that allows all Pennsylvania communities to protect our right to breathe clean air. Secondhand smoke contains over 4,000 chemicals, including arsenic and cyanide. And it causes lung cancer and heart disease — killing more than 2,100 Pennsylvanians each year. That's why 84% of voters want all workers protected from secondhand smoke.

Tell the Legislature: Let all communities protect our right to breathe clean air. Support smoke-free workplaces for all.
