* 2008 and 2009 annual spending include state and federal funds. For FY2009, federal spending refers to a nine-month grant provided to the states by the U.S. Centers for Disease Control and Prevention for the period beginning July 2008. In April 2009, the CDC will transition to a new funding agreement with the states that will provide the usual 12-month grant.

** The CDC recently updated its recommendation for the amount each state should spend on tobacco prevention programs, taking into account new science, population increases, inflation and other changes since it last issued its recommendations in 1999. In most cases, the new recommendations are higher than previous ones.
