STATE TOBACCO-PREVENTION SPENDING vs. STATE TOBACCO REVENUES AND ANNUAL SMOKING-CAUSED HEALTH COSTS

[All amounts are in millions of dollars per year, except where otherwise indicated]

Despite receiving massive amounts of annual revenue from tobacco taxes and the state tobacco lawsuit settlements with the cigarette companies, the vast majority of states are still failing to invest the amounts recommended by the U.S. Centers for Disease Control and Prevention (CDC) to prevent and reduce tobacco use and minimize related health harms

*Illinois and Pennsylvania tobacco prevention program budgets for FY 2016 were not available when this report went to press. In FY2015, Illinois budgeted \$11.1 million. Pennsylvania's FY2015 annual spending was estimated at \$13.8 million (not confirmed by health department).

Notes: Annual funding amounts only include state funds. Annual state health care costs and CDC annual spending targets are from CDC, *Best Practices for Comprehensive Tobacco Control*, January 2014. National health care costs are from Xu, Xin, "Annual Healthcare Spending Attributable to Cigarette Smoking," *Am J Prev Med*, published online: December 09, 2014, <http://www.ajpmonline.org/article/S0749-3797%2814%2900616-3/abstract>. State revenue estimates reflect our understanding of the consequences of implementing the decisions reached by the arbitration panel in the Non-Participating Manufacturers (NPM) Adjustment arbitrations in 2013, the implementation of the March 2013 settlement between 22 States and the Participating Manufacturers, and the August 2015 settlement between the Participating Manufacturers and the State of New York. As some issues remain the subject of litigation, the actual revenues might differ from these estimates. Estimated state tobacco tax revenue amounts are based on monthly Tax Burden on Tobacco data, state agencies, and conservative projections using the most recent data available.
