Note: Annual funding amounts only include state funds

*In 2007 and again in 2014, the CDC updated its recommendations for the amount each state should spend on tobacco prevention programs, taking into account new science, population changes, inflation and other factors. Starting in FY2014, this report assessed the states based on the new recommendations issued in the 2014 CDC Best Practices for Comprehensive Tobacco Control Programs. Assessments for FY2009 through FY2013 are based on the 2007 CDC Best Practices for Comprehensive Tobacco Control Programs; earlier assessments are based on 1999 recommendations. **In FY2012 and FY2013, Alabama's tobacco prevention program budget was unavailable at the time this report went to press. ***In FY2016, Illinois' tobacco prevention program budget FY2016 was unavailable when this report went to press. §Georgia's FY2018 state spending number reflects a change in categorization of state spending. §§Oklahoma's FY2018 spending number reflects the Tobacco Settlement Endowment Trust amount. At the time of publication, Oklahoma had not passed a budget, which may include additional appropriations.

¶California's FY2018 state spending number represents five quarters worth of funding. ###Vermont's FY2019 state spending number reflects a change in categorization of state spending. ¶Missouri's FY2020 state spending number reflects a change in health department reporting methods.
