

## STATE TOBACCO PREVENTION SPENDING vs. TOBACCO COMPANY MARKETING

States today are still failing to invest in programs that prevent and reduce tobacco use and its related health care costs at the levels recommend by the U.S. Centers for Disease Control and Prevention (CDC). Moreover, despite evidence showing that cigarettes are more deadly and addictive than ever before, several states have taken a step backward and significantly reduced their tobacco prevention spending. At the same time, the tobacco industry continues to spend overwhelming sums to market its products. As a result, states are being greatly outspent.

States' tobacco prevention investments amount to a small fraction of tobacco industry marketing expenditures. In Michigan, for example, the tobacco industry spends \$162 to promote its deadly products for every single dollar the state spends to prevent and reduce tobacco use and its harms. To look at it another way, Michigan's tobacco prevention spending amounts to less than one percent of the tobacco industry's marketing expenditures in the state. Nationwide, the tobacco industry is outspending tobacco prevention funding in the states by 11.7 to 1.\*

All amounts are annual and in millions of dollars per year, except where otherwise indicated. Full values are listed for amounts below one million.
