

## STATE-SPECIFIC ESTIMATES OF TOBACCO COMPANY MARKETING EXPENDITURES 1998 to 2020

The major tobacco companies now spend \$8.4 billion per year—over \$23 million every day—to promote their products nationwide. These tobacco industry marketing expenditures have overwhelmed any public health benefits from the marketing restrictions that were put into place in late 1998 by the Master Settlement Agreement (MSA) between the states and the tobacco companies. Cigarette marketing expenditures accounts for 93.3 percent of all tobacco industry marketing, and the vast majority of cigarette marketing expenditures are directly linked to individual pack sales through price discounts, sales-related promotional allowances, coupons, sales-linked bonus items and similar price-related promotions.

Precise data on how much the tobacco industry spends on marketing in each state is not publicly available, but the following table provides state-specific estimates of combined marketing spending by cigarette and smokeless companies based on the number of cigarette packs sold in each state as a percentage of total nationwide sales.

Because of the formula used for making the state-specific estimates, the listed state-specific changes in estimated tobacco industry marketing largely reflect the relative pack sales changes in each state, which tracks the vast majority of cigarette company marketing expenditures. Some tobacco industry marketing, however, is not directly linked to pack sales; and there is some evidence that the cigarette companies increase their marketing efforts in states that have recently passed cigarette tax increases in an attempt to dampen the effect of the cigarette tax increases on reducing consumption.
