Implementation date and additional rounds
2011 and 2015

Tobacco products package coverage and location
Graphic health warnings are required to cover the bottom 50% of the front and 50% of the back of the package. Overall, 50% of the package space is allocated to health warnings.

Misleading information
Misleading descriptors such as ‘light,’ ‘low tar,’ ‘mild,’ are prohibited from appearing on packages.

Constituents and emissions information
A single message is required to display qualitative (descriptive) constituents and emissions information on one lateral side.

Special notes
Legislation applies to all tobacco products (combusted and smokeless) without specifying the content of the warnings for each type of tobacco.

Rotation schedule, history, language, and help for smoking cessation
El Salvador has produced two rounds of graphic health warning labels:

<table>
<thead>
<tr>
<th>Round (Year)</th>
<th>Number</th>
<th>Size (%) [average— front/back]</th>
</tr>
</thead>
<tbody>
<tr>
<td>R1 (2011)</td>
<td>6 pairs</td>
<td>50— 50/50</td>
</tr>
<tr>
<td>R2 (2015)</td>
<td>5 pairs</td>
<td>50— 50/50</td>
</tr>
</tbody>
</table>

Warnings within each round are required to be rotated for a period of 12 months. Warning texts must be in Spanish, the principal language of the country. A quit line phone number is required to be displayed on the package.
