Implementation date and additional rounds
2016

Tobacco products package coverage and location
Graphic health warnings are required to cover the bottom 40% of the front and 40% of the back of the package. Overall, 40% of the package space is allocated to health warnings.

Misleading information
Misleading descriptors such as ‘low tar,’ ‘light,’ ‘ultra-light,’ ‘very light,’ and ‘mild’ are prohibited from appearing on packages.

Constituents and emissions information
No message is required to display qualitative (descriptive) constituents and emissions information.

Special notes
Legislation applies to all tobacco products (combusted and smokeless) without specifying the content of the warnings for each type of tobacco.

Rotation schedule, history, language, and help for smoking cessation
Kyrgyzstan has produced one round of graphic health warning labels:

<table>
<thead>
<tr>
<th>Round (year)</th>
<th>Number</th>
<th>Size (%) [average— front/back]</th>
</tr>
</thead>
<tbody>
<tr>
<td>R1 (2016)</td>
<td>12</td>
<td>40— 40/40</td>
</tr>
</tbody>
</table>

Warnings within the round are required to be rotated for a period of 3 years. Each warning is to be rotated for a period of 4 months. Warning texts must be in Kyrgyz (front) and Russian (back), the principal languages of the country. A quitline phone number and government-sponsored website are required to be displayed on the package.
